

TENTATIVE PROGRAM

The program will include plenary sessions hosting distinguished invited lecturers, round tables, memorial and honorary lectures, young researchers' awards.

Parallel sessions for each theme will be opened with the presentation of a leading paper, selected amongst the submitted ones, and then will continue with the oral presentations. Other papers will be presented in poster sessions.

Parallel sessions will also host workshops on recent earthquakes, presentations of round robin tests and test sites, reports on large collaborative research projects.

The TC203 Meeting is scheduled as the closure of Tuesday programme, while the gala dinner will be hosted on Wednesday night.

Technical visits are scheduled in the days after the conference: inside Roma at Metro line worksites, outside Roma on sites struck by recent earthquakes (Central Italy 2016 and L'Aquila 2009). More details are reported in the specific pages.
